

HTML Learning Notes:-

1. Headings:-

Heading define titles and subtitles on a webpage.

HTML provides six heading tags from `<h1>` to `<h6>`

EX:- `<h1> welcome </h1>`

2) Paragraphs:-

Paragraph are used to display text content in a clear and structured formate.

EX:- `<p> This is a paragraph </p>`

3) Lists:-

Lists help organize information in a easy-to-read format

- `<ul>` = Unordered list (bullets)
- `<ol>` = ordered list (numbers)

4 . Tables:-

Tables are used to display data in rows and columns in an organized manner

5) Links :-

Links connect ~~one~~ webpage to another and help user navigate website easily.

ex:- `<a href = "url" > click Here </a>`

6) images :-

Images are added to webpage to improve visual appearance and user engagement.

Ex:- `<img src = "image.jpg" alt = "Image" >`
